"Let Our Family Help Protect Yours!"

Best Value and Services Guaranteed!

Which Shelter Works Best for You?

Questions to ask yourself...

Will elderly or handicap people ever be using this shelter?

Will pets ever need access to this shelter?

Are you limited on space in your garage or yard?

Are you more comfortable above ground or below ground?

Do you prefer a door to slide or to swing?

Do you prefer to walk in or climb down into your shelter?

Is an indoor or outdoor shelter right for you?

Do you prefer the shelter to be close to or further away from the house?

Do you have the necessary width and height clearance for your installation type?

Deluxe Installation

Standard Installation

A section of concrete is cut and removed, the hole is dug to the proper depth.

Step 1

A Magnesium Anode is buried and the shelter is placed in the hole.

Step 2

The Deluxe shelter is surrounded on all four sides with ready mix concrete with no dirt backfill.

Step 3

The finished install will have concrete slightly raised to redirect water, a come-along installed inside the shelter.

Step 4

A section of concrete is cut and removed, the hole is dug to the proper depth.

Step 1

The shelter is placed in the hole.

Step 2

Following the engineering specifications, the shelter is backfilled with dirt and then topped off with Quikrete®.

Step 3

Finished install with concrete slightly raised to redirect water, and then the doors are installed to complete the process.

Step 4

Special Features for Deluxe Installation

Ready-mix concrete from top to bottom on all four sides, magnesium anode, dust free installation, two ways to exit with an added hand winch to open the door with up to 2 tons of debris on it.

Burying Magnesium Anode.

Come-along inside the shelter.

3

Lifetime Warranty*

Special Features for Standard Installation

Dirt Backfilled and then topped with Quikrete® following engineering specifications. There are two ways to exit.

39" x 7" x 56" crimp to crimp.

with 36" door only.

Additional Bolt Together Safe Room Options:

Door on left.
Door on right.
Door on end.

Every shelter is manufactured in Perry, Oklahoma.

Customer's Testimonies:

"Ground Zero installed an underground storm shelter for us. They were incredibly prompt and professional, and dealing with them for payment processing was a breeze. They helped us decipher all the forms we filled out, and they did exactly what they said they were going to do. We couldn't have asked for a better experience, or a more cost efficient way to make our family safer" stated Sara B., Moore, OK.

"They arrived on time and completed the work in the time frame promised. They did a great job cleaning up their work area. I would not hesitate to recommend their services based on my own experience" reported Rhonda T., Noble, OK.

"Job well done today installing our shelter. We were moved up early into a cancelled spot to accommodate my husband's deployment and the men who installed our shelter were polite, professional and fast. Looks great and we are very satisfied customers" said Melissa T., Oklahoma City, OK.

"The sales people were very informative and accurate in their information. The process from the time we signed up to the point that the installation people drove away went smoothly they were a well-oiled machine! After the unit was in, the installation supervisor went through the "how to's" for us again and gave several very useful suggestions about how to make the unit more habitable and safe" stated Scott M., Midwest City, OK.

Meets FEMA standards 320, 361 ICC 500 and carries engineer seal.

Impact tested by Texas Tech Wind and Science Institute.

Contractor guarantees that the work will be of professional quality.

Our goal is outstanding customer service.

We have an A+ rating with the BBB and A rating on Angie's List.
